

FROM THE
DIRECTOR'S
DESK

A child's world is a beautiful yet puzzling weave of ambitions and aspirations painted in vibrant shades of thought and deed. Since kids spend the most of their youth in school, the school environment has a significant impact on their world. I firmly think that every child is special and has a wonderful capacity for learning. In order to educate India's bright, young future in an environment that would bring out the best in them, large, planned, long-term investments are being made. The NANANEETA PUBLIC SCHOOL was founded on the principle that every person has the capacity to transcend their circumstances and lead a fulfilling life. Children, given the correct setting, can - and will - gravitate towards the instinct of purity, and make positive decisions in life, much like an oyster provides the ideal atmosphere to raise a pearl.

The implicit goal of The NAANEETA PUBLIC SCHOOL has always been to provide students with a life-changing education that is grounded in the greatest standards of academic achievement and enhanced by the chance to learn in the most ideal environments. NAVANEETA PUBLIC SCHOOL works to give its kids the tools they need to succeed academically and be tech-savvy. For the next generation to assume leadership roles and tackle the myriad problems facing our society, students will need to be exceptionally academically gifted and intellectually creative. Let education assist loving NAVANEETANS in becoming self-sufficient and changing the world so that truth, justice, liberty, and equality rule.

Thank you!

Chinta Govind Viswesh
